Do We Need Application Modeller?

Configuration errors are costing us time and money, what can we do?

Human error can strike without warning. Issues cost time and money, negatively affect reputation and lead to missed opportunities. Regulators do not accept excuses. Application Modeller improves how you implement and manage your configuration changes.

How does Application Modeller work?

No matter how many instances of the application you have, our powerful solution generates your configuration files automatically. **You only have to make a change once**, as Application Modeller applies any change you make to every instance. The result? A pipeline you can manage effectively, predictably and consistently.

Can Application Modeller integrate and perform under my environment?

Yes, the solution was designed with Tier 1 banking institutions in mind and can be applied to **distributed applications of any complexity**.

Be a Leader with Application Modeller

- ✓ **Gain control ahead** of MiFID II and ensure your team is ready for the changes.
- ✓ Be the organisation making headlines for the **right reasons** - Remember when Knight Capital famously lost \$440m in 30 minutes?
- ✓ **Protect your bottom line** and strengthen your strategic position with a solution that delivers.

85 release changes

IN 18 MONTHS

zero FAILURES
